 **SUPERPOD[®]**

Travel accommodation usually involves battling the outside temperatures while inside the building.

Discomfort, noisy ineffective split systems, stuffy or dry interiors, and expensive bills for the operator...

Not really sustainable.

Superpod® redefines
the travel experience by
improving COMFORT...
cutting COSTS...
and
lowering CARBON EMISSIONS.

Now that's sustainable.

Redefine
the travel experience of
COMFORT...

*“We stepped in during a hot,
windy day into a cool quiet
home... it really is inspiring.”*

REDEFINING COMFORT

Copyright 2017 Superpod®

Redefine the travel
experience of *COMFORT...*
*“The house was different
from the moment I
stepped in. I was feeling
cold outside but it was
warm inside with no
heater.”*

REDEFINING COMFORT

Redefine the travel experience of *COMFORT...*
*“There were no drafts, yet the air was fresh.
No stuffy, dry, aircon running. My hay fever
suddenly dissipated!”*

REDEFINING COMFORT

Copyright 2017 Superpod®

Redefine the operator's
COSTS...

*“Imagine cutting
your aircon power
bills by 70-80%!
Now we can
really improve our
bottom line.”*

REDEFINING COSTS

Redefine lower *CARBON EMISSIONS*...

*“Imagine cutting your aircon power bills by 70-80%!
Now we can really improve our bottom line.”*

That’s because you’re drastically cutting consumption.

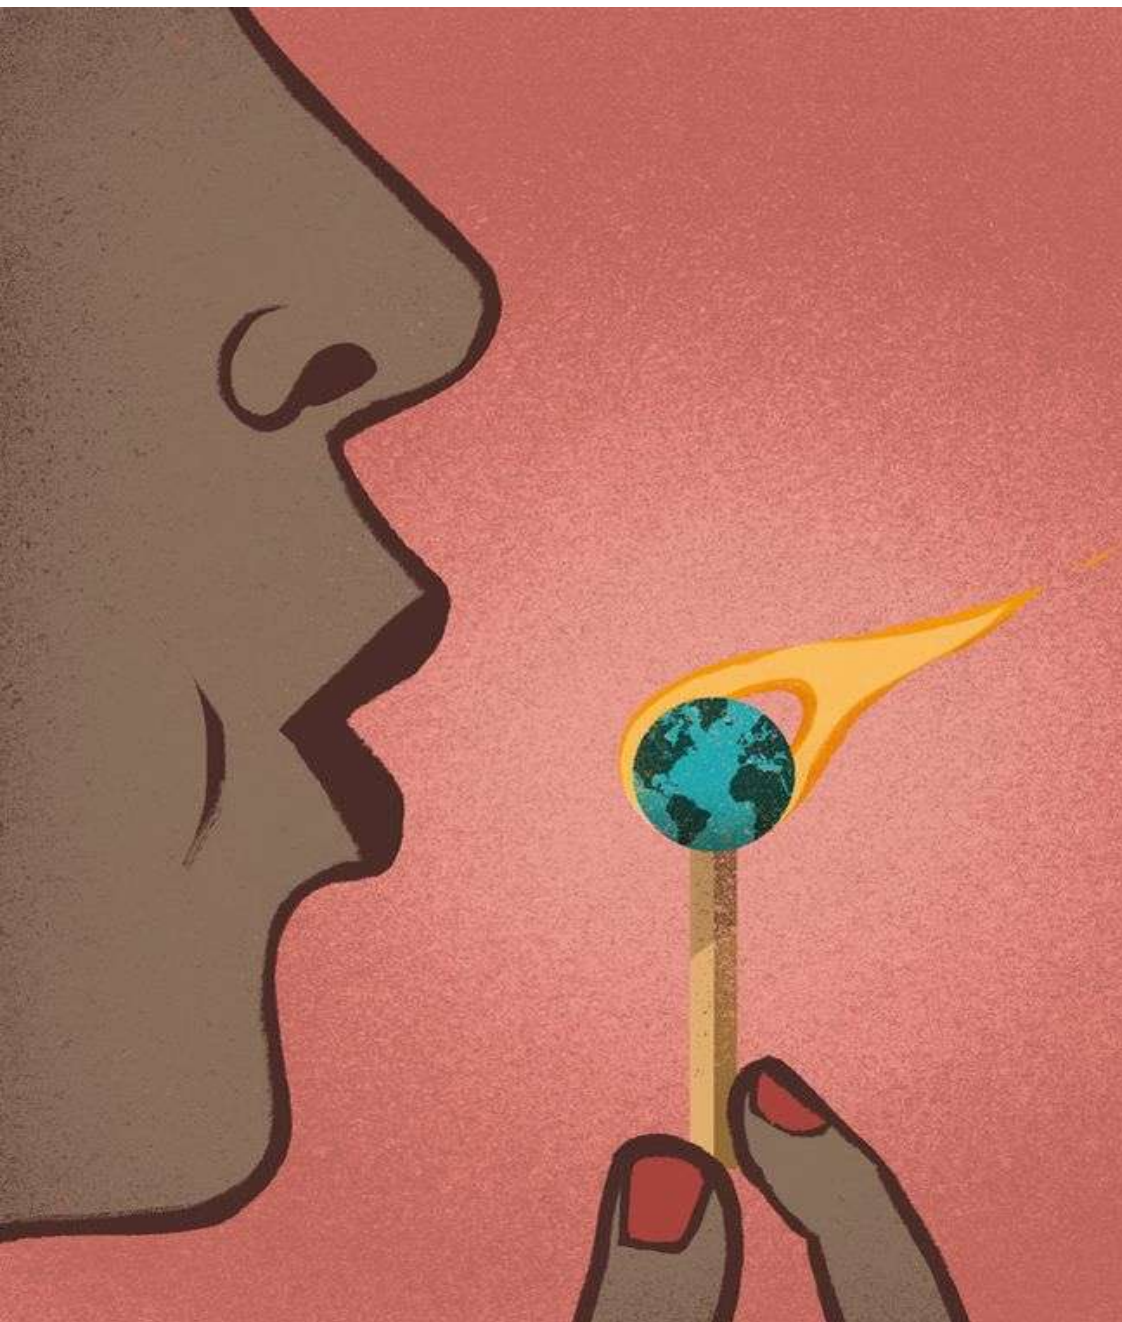

Rethink your need for a mini-power plant to run your business. Put less pressure on your local grid.

REDEFINING LOWER CARBON

Copyright 2017 Superpod®

Redefine
lower *CARBON*
EMISSIONS...

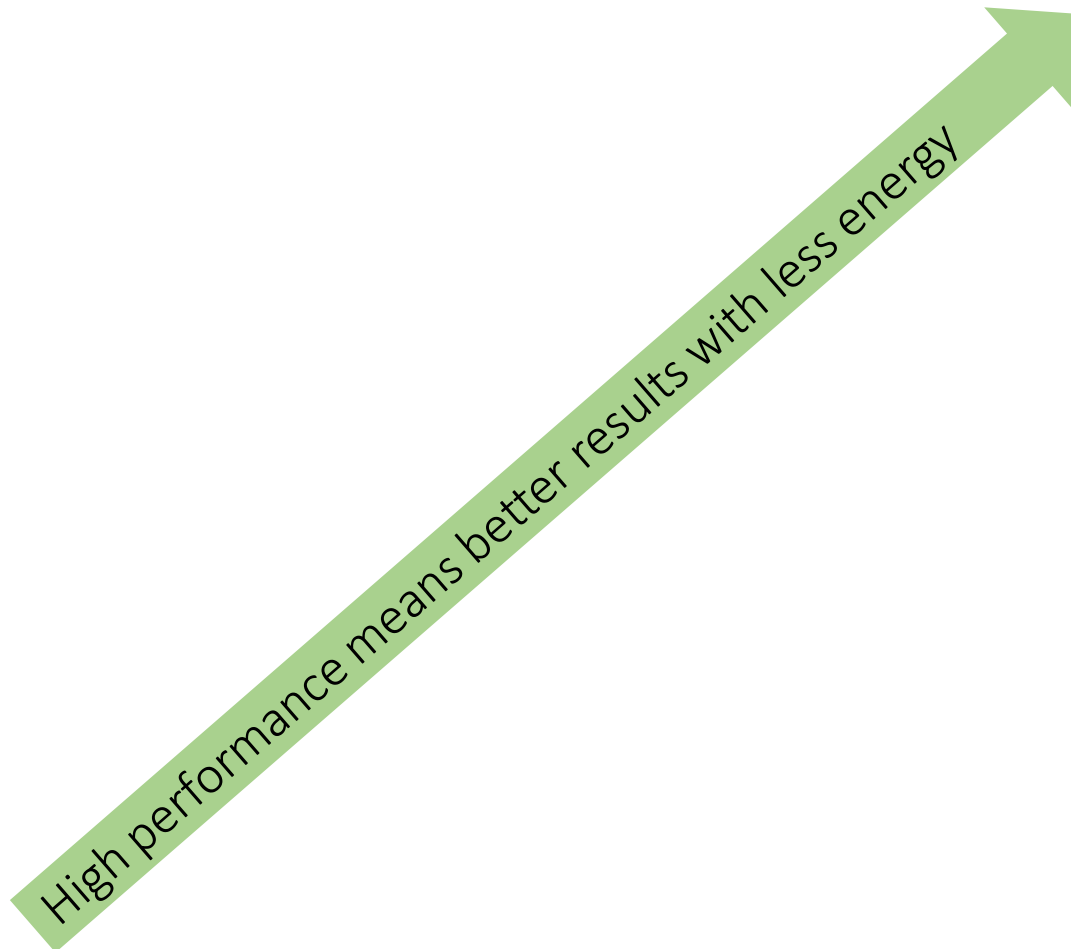

*“I’m proud to be leading
the field in sustainable
business practices. Now
we can really reduce
our carbon emissions
and show others how
it’s done.”*

REDEFINING LOWER CARBON

Conventional building
poor performance –
expensive to run and
uncomfortable

Superpod® Passive
House Standard
performance – cheap
to run and
comfortable

REDEFINING LOWER CARBON

How do we do it?

We redefine
CONSTRUCTION...

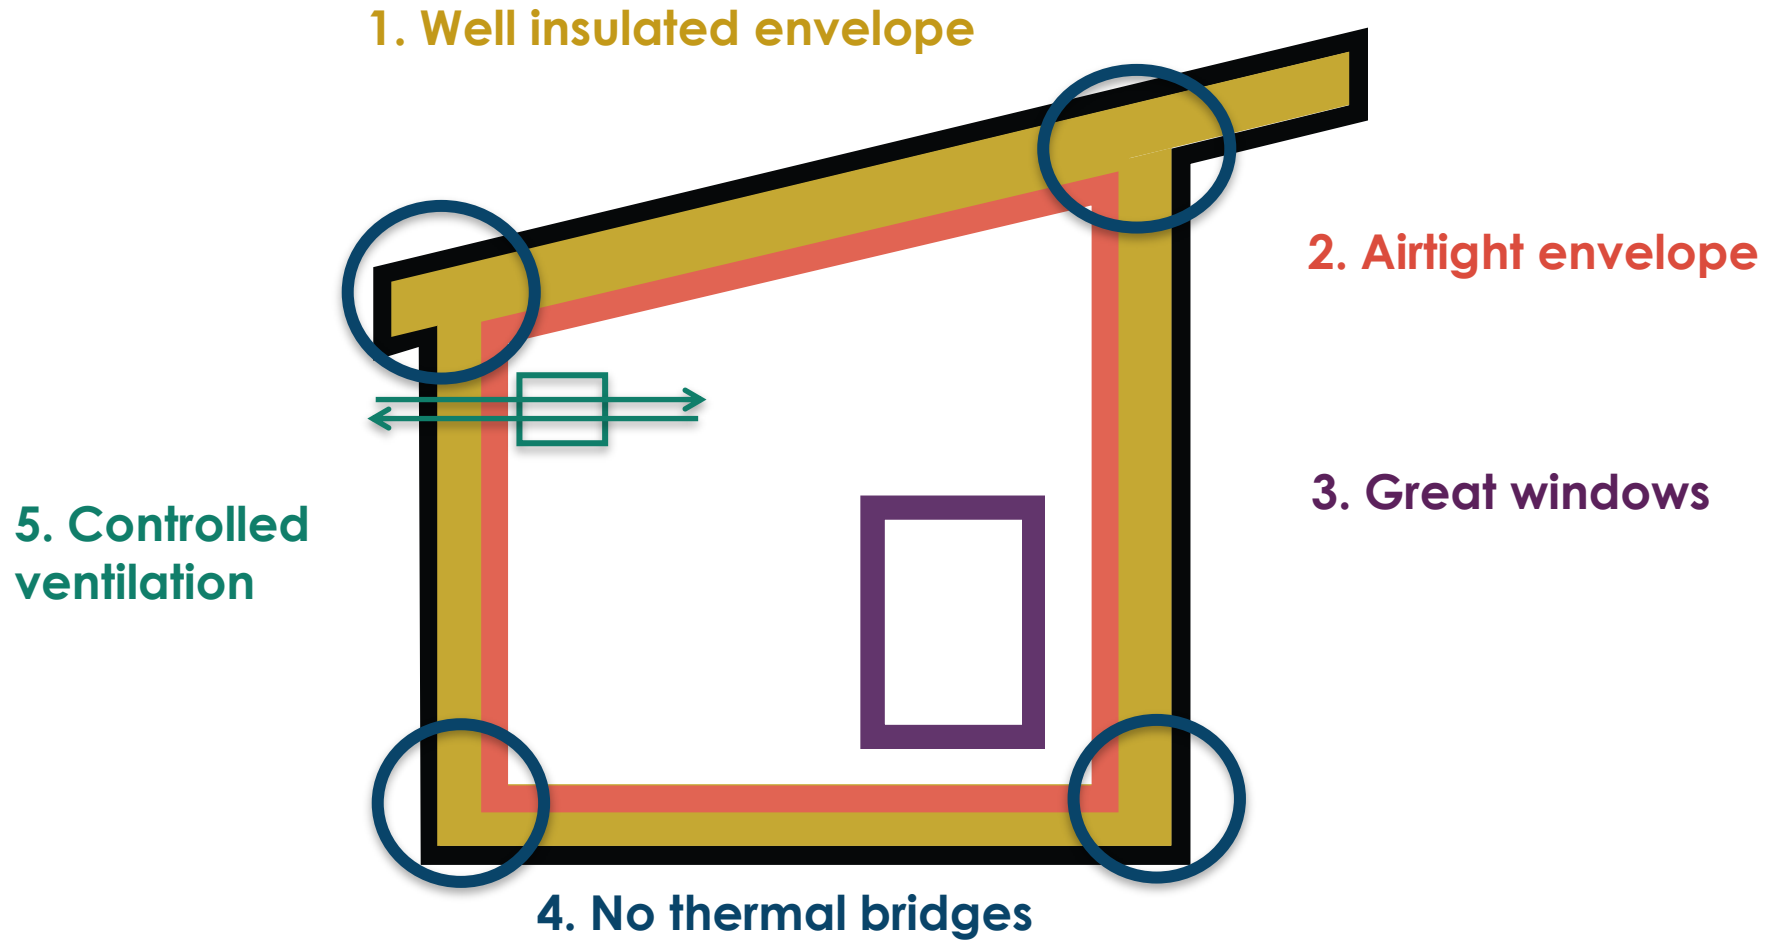

Redefine CONSTRUCTION...

“Now we realise that our construction approach was all wrong. By designing and building Passive House Certified buildings, it has really lifted our game.”

REDEFINING CONSTRUCTION
